

## **The Darkroom Cookbook, 2nd Edition**

There is one major mistake in the 2nd edition. Throughout the book it is stated:

"The best method to mix a solution of sodium hydroxide, is to measure out the amount to be used, place it in a dry glass or plastic mixing container, and slowly add cold water."

This is incorrect. It should read:

"The best method to mix a solution of sodium hydroxide, is to measure out the amount to be used, and slowly add it to cold water."
